

<http://www.datascience.co.ke>

DataScience Ltd is a Software Engineering company that has had a main focus in building information systems through data based innovation, research and reporting using various data sources and tools to carry out analytics and build systems that communicate data in ways that can easily be comprehended by non-data experts. Our main focus is to make data simple. We are dedicated to scrapping, mining and analyzing data to draw conclusions and pointers in the service delivery and resource allocation industry. Our mission is to advocate for the use of data for innovation around resource allocation, policy making, demand driven service access, transparency and delivery, as well as creating a platform where stakeholders can access and use not only the reports but their accompanying data as well.
