

Oracle Technologies

<https://www.oracle.com/ke/index.html>

Oracle offers an integrated array of applications, databases, servers, storage, and cloud technologies to empower modern business. For most companies, flexibility is critical. Oracle provides a wide choice of software, systems, and cloud deployment models—including public, on-premises, and hybrid clouds—to ensure that technology flexes to the unique needs of a business. Oracle Cloud is a complete, integrated stack of platform, infrastructure, and application services. With advanced scalability and security, Oracle Cloud enables technical agility across the enterprise, connects people to information for clearer insights, and fosters efficiency through simplified workflows. More than 420,000 customers across 195 countries and territories have harnessed Oracle technology to accelerate their digital transformation.
